

Sapphire Water Softeners

...guarding your home against hard water and limescale

Sapphire Water Softeners in Association with KCPFA

Have you ever noticed how lime scale builds up in your kettle or on the shower head or shower screen? If you have you will be aware that here in Kent we live in a hard water area.

We provide a whole house solution to this problem by installing a water softener to the incoming mains water supply to remove all the chalk from the water.

The benefits are far reaching. Many household appliances such as the boiler, washing machine, dishwasher, kettle and shower will become more energy efficient and will have a longer life expectancy. Dry skin conditions can be greatly improved by bathing in soft water and there is far less cleaning required in the kitchen and bathroom.

Key benefits for KCPFA members:

- All members will receive a 50% discount on the cost of installation when purchasing a water softener or filter system for their home or business premises.
- We offer a free in home demonstration service and survey. This is the time to get any questions answered and we will provide a no obligation quotation.
- Water softeners can be purchased outright; funded with a hire purchase agreement or trialed on a rental basis.
- We can offer a 10% discount on all salt deliveries to members who already have a water softener.
- We will upgrade existing drinking water filters to our high quality, annual change filter cartridges. Members will be charged only for the filter, not for any change over costs.
- Members can extend the discounts offered under this scheme to members of their family.
